A meeting point to shape the digital, electric and high-capacity future of freight

International Forum for Heavy Vehicle Transport & Technology (HVT Forum)

The purpose of the International Forum for Heavy Vehicle Transport & Technology is to promote and support the development of road freight transport technology, safety and policy and to facilitate information exchange between researchers, policy makers, regulators, road agencies and the transport industry. Since its start in 1992, this has been done by running international symposia, electronic discussion groups and other relevant initiatives.
